Cryptsoft and ETI-NET extend Key Management choice for HP NonStop Systems

Press Release

ETI-NET integrates Cryptsoft Key Management SDKs into BackBox Virtual Tape

Brisbane, Australia — July 8, 2011 — Cryptsoft, a leading provider of Key Management solutions, and ETI-NET, a specialized developer of storage interfaces for multi-vendor data centers, today announced encryption key management support in data protection solutions for HP NonStop servers.

A joint integration effort between the companies has enabled support for a range of external key management servers for the ETI-NET BackBox virtual tape product.

Virtual tape images can be transparently encrypted in industry-standard format using keys securely generated and delivered by an HP Enterprise Secure Key Manager (ESKM) or alternatively any key management server that supports the OASIS open standards consortium Key Management Interoperability Protocol (KMIP).

"Cryptsoft's KMIP SDKs made adding enterprise key management support a simple task. We were retrieving and vaulting keys with both ESKM and KMIP with less than a week of engineering effort" said Fernand Lussier, ETI-NET's Vice President of Research & Development. "The result is the first virtual tape encryption solution for NonStop that enables choice of enterprise key management solutions."

"Adding support for OASIS KMIP allows the benefits of open key management standards, while support for the HP ESKM recognizes existing user investment" said Tim Hudson, technical director at Cryptsoft.

About Cryptsoft

Cryptsoft provides specialist products and services for software and hardware developers in the areas of security system design, deployment, validation and interoperability. Cryptsoft offers a range of software development toolkits to enable the rapid integration of enterprise key management solutions into applications. For more information see http://www.cryptsoft.com/.

About ETI-NET

ETI-NET develops products which help customers manage the complexities of multi-vendor computer systems. ETI-NET products integrate storage resources from dissimilar computers and provide cost-effective consolidation and management of backup and archiving operations. With a product development center in Montreal, Canada and field operations

centers in Boca Raton, Florida and San Mateo, California, ETI-NET has been shipping products for HP NonStop systems since 1987. ETI-NET supports customers worldwide and can be contacted by phone at 1-561-395-2278 or by email at information@etinet.com . To learn more about ETI-NET, visit www.etinet.com.
